Contents

1 Read and write 3D tiff

`readTIFF()` and `writeTIFF()` in the `tiff` package do not handle 3d stacks the right way. `bioimagetools` uses readTIF().

```
> library(bioimagetools)
> img <- readTIF("http://ex.volkerschmid.de/cell.tif")
> print(dim(img))

[1] 512 512   3  52
```
